

Curtain equipment selection checklist

Editorial checklist; not a manufacturer installation manual.

1. Confirm permission for the item and the specific cleaning method.
2. Confirm curtain-tool and connection versions.
3. Check permitted chemistry and temperature in material instructions.
4. Inspect the trial area after drying.
5. Agree surface protection, drying and completion criteria.

Checks before selecting the tool

Check	Decision basis
Material permission	Manufacturer instructions take priority over general advice
Connections	Confirm tool, hose and quick-coupling versions
Flow	Establish on a trial area, not from the pump name
Drying	Agree conditions and completion criterion beforehand
