

Purezza Carpet Cleaning Checklist

A short workflow for inspection, chemistry, tool selection, extraction and drying.

Before cleaning

- Identify carpet fibre, pile and backing condition.
- Test colourfastness.
- Dry-vacuum in two directions.
- Protect floors and adjacent surfaces.

Purezza extraction

- Apply solution evenly and respect dwell time.
- Select a carpet tool for area and pile height.
- Start with the minimum effective flow.
- Make one or two vacuum-only passes after wet cleaning.

Drying and handover

- Expose several sides of the covering to air.
- Do not fold wet carpet or cover it with plastic.
- Use directed drying on large areas.
- Explain the return-to-use conditions to the customer.

Control	What to check
Pile	No colour transfer or backing damage.
Solution	No over-wetting or excessive foam.
Tool	Width and operating mode match the carpet.
Drying	Airflow and access to the surface are available.

Important: confirm fabric compatibility and current equipment specifications before starting.
