

Purezza Cleaning-Team Package

A workload, equipment and reserve calculator.

Measure

- Record preparation, extraction, drying and logistics time.
- Find the stage where operators wait for equipment.

Build

- One operator: Purezza, tool, chemistry, consumables and an air mover.
- Pair: split preparation and extraction; use two air movers.
- Team: two machines, several tools and reserve equipment.

Protect the schedule

- Separate high-load equipment across approved circuits.
- Keep spare jets, connectors and seals.
- Maintain a service log.

Format	Package reference
1 operator	1 Purezza + 1 SU-290 + consumables
2 operators	1–2 Purezza + 2 air movers after measurement
Team	2 machines + 3–6 air movers + reserve
Reserve	Standardized hoses, connectors and parts

Important: follow material-care, chemical and electrical-safety instructions. Confirm current equipment specifications before work.
