

Hose and tool compatibility checklist

Editorial checklist; not a manufacturer installation manual.

1. Identify the Purezza model and actually fitted parts.
2. Photograph both hose ends and tool connections.
3. Confirm the vacuum and solution lines separately.
4. Check thread size/type, mating part and component limits.
5. Obtain the full connection parts list from the supplier.

Information to send before ordering

Assembly	What to confirm
Vacuum line	Connection size and version at both ends
Solution line	Machine, hose and tool joints
Threaded joint	Size, thread type and mating component
Operating conditions	Each component's pressure, temperature and chemical limits
Adapter	Whether required and its confirmed specification
